Activities and Expenditures Report

Preface

Pursuant to the reporting requirement in Section 80250 of the California Water Code, the following information reflects energy acquisition activities and expenditures incurred by the California Energy Resources Scheduling Division (CERS) of the Department of Water Resources for the third quarter of 2008. Included are all costs related to energy acquisition and administration.

CERS purchases power under the terms of its existing contracts, all of which were entered into prior to January 1, 2003. The scheduling, dispatch and certain other administrative functions for the existing contracts are managed by the investor owned utilities. CERS continues to have financial and legal responsibility for its contract portfolio and will oversee repayment of the revenue bonds.

The audited financial statements for the years ended June 30, 2008 and 2007, and the un-audited financial statements for the quarter ended September 30, 2008, prepared in accordance with generally accepted accounting principles, can be referenced at the following link: http://www.cers.water.ca.gov/financial_bonds.cfm

This report is available on the DWR website at www.cers.water.ca.gov.

Cash Balances

September 30, 2008

(in millions)

Power Accounts

Operating and Priority Contract Accounts	\$	924
Operating Reserve Account		548
